Fizx

Organisation Name: Fizx
An IT Security company specializing in 24/7 cyber security reliability
Projects: Website
Projects: Fizx Infrastructure
Projects: Fizx Marketing
New project: SafeTax

format: firstinitial.lastname@fizx.com

scenario:

I am an already existing vendor that already bought the vendor platform from supplier
Vendor has access to the platform, but not yet customized

Vendor has some licenses to personalization of the platform that he bought from the supplier

- vendor can personalized the color and adding or changing a logo
- Vendor can personalized the Authentication method and for logging in at their own risk
- Vendor can create new projects
- Vendor can customerize his projects that he can call to the customers

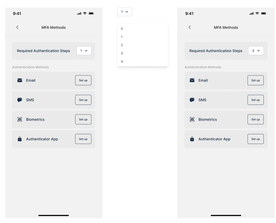
scenario:

TFC platform vendor edition
Combined Prototype
Demo

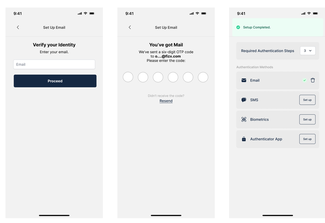
Edit profile

MFA Methods

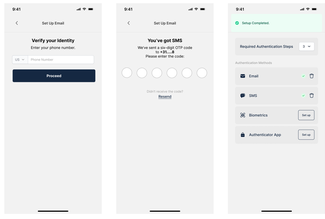
Multi-factor authentication is an electronic authentication method in which a user is granted access to a website or application only after successfully presenting two or more pieces of evidence (or factors) to an authentication mechanism: possession, and inherence.



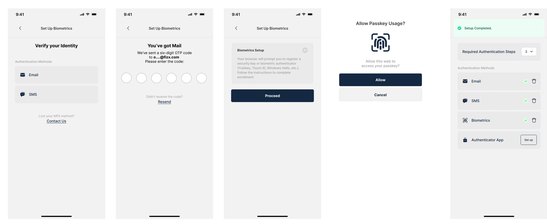
MFA Methods: setup email MFA



MFA Methods: setup SMS MFA



MFA Methods: setup biometrics



MFA Methods: Authenticator app
